## Preparação Ambiente de Desenvolvimento

Last updated by | Gustavo Henrique | Jan 21, 2020 at 9:39 AM GMT-3

## Instalações

- Visual Studio Community 2017
  Framework 4.0.30319
  Compilador 4.8.x
- SQL Server 2017 Developer Edition
- IIS
- .NET Core Runtime e SDK (mesma em todos os projetos)
  .Net Core 2.1
  C# 5
- Marcar a opção "Development time IIS support" da instalação do Visual Studio

- Instalar node (node-v10.8.0-x64.zip)
- Instalar Angular 6 CLI:
  npm install -g @angular/cli
- Instalar VSTS NPM:
   npm install -g vsts-npm-auth --registry https://registry.npmjs.com --always-auth false
   vsts-npm-auth -config .npmrc
